Science	Energy and Change	<ul style="list-style-type: none"> ➤ Awareness that energy is present in daily life ➤ Understands that energy is required for different purposes in life

Phases of development

Early childhood (typically Pre Primary to Year 3)
 Middle childhood (typically Year 3 to Year 7)

Activity resources required

Access to the Internet to play **Western Power's** electrical safety game.

Glossy magazines, electrical sales brochures, textas, scissors & glue to help students identify areas in the home where electricity and water are used in close proximity. This will assist in recognising the potential hazard that **electricity and water do not mix**.

Procedure

Work in groups or individually and visit; www.westernpower.com.au
Click on site index, select Power Kids Club, select guests and click play the Electrical Safety Hazard Game for 1-3 players.

Students break into small groups under the headings of kitchen, bathroom, laundry, pool and/or workshop. Students brainstorm the number of electrical items that are used in each of these rooms each day. Students can list these or use pictures from magazines. Students report back to class the number of items they have found that are used in wet areas in their home.

Community Links

How could the school involve the local community in Safety in Schools Week?

Book your school in for the **Free Shock Proof! In-School Safety Program**. Our presenters will move from class to class.

How could the school involve parents and seniors in Safety in School Week?

As a follow up to the safety talk, invite parents and family members along to class to share their experiences about electricity.

Encourage students to take their Shock Proof! material home and talk about it with their family. ***Have an electrical safety switch installed!***

Policy and Procedures

Are you aware of the schools written Health and Safety Policy? If not: -

- Check with administration
- Refer to the Department of Education Risk Management Policy,
- Visit the Safety Rules OK! website for guidelines www.safetyrules.health.wa.gov.au
- **Do you have safety structures and procedures in place?**

For example: In the event of an electrical accident, does your school have an emergency plan? Do your students and staff know the plan?

Other resources available

Free Shock Proof! In-School Safety Program – available all year from Term 1- 4. Presenters spend 35 to 45 minutes with each booked class. They use role plays, posters and real-life props to encourage active learning.

We provide each class teacher with a support pack reviewing key safety messages, colourful brochures and a letter to parents telling them of Shock Proof! Each school library receives a 6pack of colourful safety posters reinforcing key safety messages.

Shock Proof! An Electrical Safety Kit For Schools: designed as a classroom resource for secondary teachers, but available free to interested primary schools.

World of Energy implements Western Power's Energy Education Program with interactive displays, curriculum linked programs for schools and much much more!

For information please contact **World of Energy:** (08) 9430 5655.

Electrical Safety Switches install one in your house and enjoy a new level of safety. Contact: **Energy Safety** 9422 520 www.energysafetydocep.wa.gov.au
